Page 8, line 28, cancel "(Fig. 2a)"; line 29, cancel "(Fig. 2a)".

#### REMARKS

The absence of figures in the Patent Office file of the subject application was reported to the undersigned on July 13, 1999. A filing date was accorded the application. While copies of the drawings are present in the attorney's file, the coversheet and postcard do not indicate that drawings were included with the filing documents. Therefore, it is uncertain whether drawings were included and lost by the patent office, but were not indicated in the filing papers, or the drawings were not included. To ensure that the filing date of the application is confirmed, regardless of what occurred, the application has been amended to remove any reference to the drawings and language substituted, which in no wise adds new matter.

The references to the drawings provided a description of the data and the conclusions to be drawn from the observations. The invention is a method which is described and is capable of being performed without the figures. The figures were representations of the data disclosed

in the application, where the data disclosed support the validity of the conclusions set forth in the application. Therefore, the application was complete without drawings and the drawings merely added graphic depictions of the evidence described in the application.

The Examiner is respectfully requested to enter the above amendments to provide for a more accurate specification. If the Examiner believes that a telephone conference would expedite prosecution of the subject application, the Examiner is authorized to call the undersigned collect at 650 328 4400.

Respectfully submitted,

Bertram I. Rowland, Ph.D.
